

# Preparing for AP Courses Workshop

## from H & H Advancement

**Time:** Sunday morning,

**Where:** Room F-209

### **Speakers:**

Scott Halander                      2008 American Chemical Society Outstanding Chemistry Teacher

Bruce Hubschmitt                2014 Crystal Apple Recipient and 2012 Teacher of the year

Bruce and Scott each have more than fifteen years of high school experience and more than a decade teaching AP courses at Westview High School with passing rates well beyond the national standard. Since 2014, they have helped more than 300 students prepare for AP math and science courses as H & H Advancement summer program instructors. They want to share what they have learned over the years about what helps students succeed in AP math and science. They will also conduct a question and answer session after this presentation.

### **Topics discussed in regard to math/science AP courses:**

- Common challenges that students and parents should prepare for
- Courses to take before math/science AP courses
- What makes a successful AP student
- Signs of a struggling student
- Time management
- Course selection strategies
- Special considerations for future 9<sup>th</sup> grade students
- H & H Advancement Summer Program details
